CONFIGURATOR CMS

Configurator KNS is a brand new intuitive IT program, which provides a greater comfort in using the KOPOS websites. This program, which allows the user to better work with cable management portfolio is user-friendly and does not require deep knowledge of the products. The main intention is to easy explain what items you need to set up the cable trace.

- always actual products
- easy orientation in the program- intuitive user environment
- easy setting up of the cable trace
- the possibility of separate choice of the trace and fixing
- the possibility of the saving of the program and later continuation
- the final list of the items including the EAN codes
